MINORITY REPORT

Mitigating environmental disruptive events using people-centric predictive digital technologies to improve disaster and climate resilience

About

Minority Report is a pioneering project dedicated to enhancing the resilience of vulnerable urban populations and their built environments against disruptive climate events.

As climate change accelerates, the frequency and intensity of events such as flash floods, forest fires, and storm force winds increase, disproportionately affecting the most vulnerable communities.

Our mission is to leverage cutting-edge technologies and collaborative approaches to safeguard these populations and their homes.

16 partners from Europe and New Zealand

42 months

3 demonstration cases

Impact

The implementation of the Minority Report platform will have profound

Improved Resilience: Enhance the ability of vulnerable populations to withstand and recover from climate events.

Economic Savings: Reduce the economic losses associated with climate events by protecting critical infrastructure and homes.

Sustainable Urban Development: Promote environmentally friendly and sustainable practices in urban planning and building renovation.

Community Empowerment: Engage local communities in decision-making processes, ensuring that interventions are effective and culturally appropriate.
